

FOREST COUNTY HEALTH DEPARTMENT

Job Description

Position Title: Public Health Nurse

Reports to: Health Department Director

FLSA Status: Nonexempt

County Status: Regular Full Time Employee (40 Hour Work Week)

Pay Grade/Pay Structure: \$22.30 - \$24.78 per hour

I. Position Summary

The Public Health Nurse provides public health nursing services to individuals, families, and population groups. Nursing actions are directed toward the goals of prevention, assessment, risk reduction, and health status improvement for individuals, families and communities. Nursing activities include, but are not limited to, systematic analysis of health data, care plan development, health education and advocacy, coalition building, and collaborating with community partners to promote the health of a population. Performs other duties as required.

II. Essential Functions and Primary Duties

Under general supervision and/or as part of various workgroups and teams, the Public Health Nurse performs the following essential functions within the framework of Forest County Health Department's provision of the core functions and essential services of public health:

Public Health Sciences

- Performs comprehensive individual and family assessments which include health history, physical assessment, growth monitoring, developmental assessment, psycho-social assessment, assessment of family functioning, assessment for substance abuse or domestic violence issues, and assessment of basic needs including food, housing, income, resources and supports, and access to health care.
- Provides care coordination, referral and follow-up to individuals and families who are members of a vulnerable population and/or high-risk groups. Evaluates outcomes, effectiveness of plan, and makes changes as necessary.
- Provides education and counseling to individuals, families and community groups that are adapted to their unique needs, lifestyle, cultural and socio-economic situation.
- Participates in the evaluation of the effectiveness, accessibility, and quality of personal health services. This includes accurate and appropriate documentation of individual and family interventions.
- Investigates complaints regarding environmental health problems and environmental health hazards and initiates enforcement or corrective actions as required.
- Uses public health surveillance/disease investigation methods in community outreach, screening, and case finding of communicable and infectious diseases that threaten the health of the community.

- Participates in response teams to prevent, minimize, and contain adverse health events and conditions resulting from communicable diseases; food-, water-, and vector-borne outbreaks; chronic diseases; environmental hazards; injuries; and health disparities.
- Responds to individual client emergency situations in the clinical or home setting with basic life support and first aid skills. Summons other health care providers and emergency response personnel in a timely and appropriate manner.
- Collaborates in development and delivery of programs and activities for individuals, families and population groups that promote health and prevent disease, in settings including, but not limited to all Health Department buildings/sites, homes, community organizations and businesses, schools, and the community in general.

Community Dimensions of Practice

- Collaborates in Forest County Health Department’s community health assessment and health improvement planning and intervention activities.
- Delivers targeted, culturally-appropriate information to help individuals and groups understand health promotion and disease prevention information, policies, regulations and local code.
- Actively participates in and acts as a liaison with other community agencies and professionals in collaborative efforts to address community health priorities
- Advocates on behalf of vulnerable individuals and populations; participates in assessing and evaluating health care services to ensure that people are informed of available health department and community programs and services and are assisted in the utilization of those services.
- Participates in Forest County Health Department research and demonstration projects that seek to improve the health of communities and determine new ways to address health issues.
- Contributes to a work environment that fosters ongoing educational experiences regarding public health nursing for colleagues, nursing and other health-related students, healthcare professionals and members of the community.

Analysis and Assessment

- Participates in community assessment; can distinguish between quantitative and qualitative community assessment data; understands incidence and prevalence data; knows how to access basic community epidemiological data.
- Participates in the analysis of data to identify trends, health problems, environmental health hazards, and social and economic conditions that adversely affect the public’s health.
